

UV Eyelash Extensions Aftercare Instructions

UV EYELASH EXTENSIONS AFTERCARE INSTRUCTIONS

Thank you for choosing our services for your UV eyelash extensions. To ensure the longevity and quality of your extensions, it's essential to follow the aftercare instructions carefully.

The First 48 Hours: Avoid Water and Steam: Do not wet your eyelashes for at least 48 hours to allow the adhesive to fully set. **No Rubbing:** Do not rub your eyes or lashes, especially when washing your face.

Cleaning: Gentle Cleansing: Use a gentle, oil-free cleanser to clean around the eye area. Do not use cotton wool as the fibres can get caught in the lashes. **No Mascara:** Do not apply mascara on the extensions as it may weaken the adhesive and cause premature fall-out.

Maintenance: Comb: Use a clean spoolie brush to comb your lashes daily to prevent crisscrossing and tangling. **Touch-ups:** Regular touch-up appointments every 2-3 weeks are recommended to maintain the look of your lashes.

What to Avoid: No Oils: Do not use oil-based products around the eyes as these can dissolve the adhesive. **Avoid UV Exposure:** Prolonged exposure to UV light can weaken the adhesive. Use UV-protective sunglasses when necessary.

If Irritation Occurs: Contact Us: If you experience irritation, itching or discomfort, please contact us immediately for a consultation.
