

MESOTHERAPY AFTERCARE

MESOTHERAPY AFTERCARE

The following aftercare advice is essential to help reduce the risk of treatment complications, to improve your comfort/healing and to help achieve the best possible results from treatment. Please follow the aftercare advice for mesotherapy.

The treated area of skin may feel slightly tender and appear red and swollen afterwards. These effects will resolve naturally and should be much improved after 48 hours but may take longer to settle. You may experience some minor bruising which may take 1-2 weeks to resolve in some cases.

Aftercare Instructions

- ☐ Use of a cold compress for swelling and arnica cream for bruising may be helpful for resolution.
- ☐ Avoid any makeup for 24 hours after treatment as this can increase the risk of infection.
- ☐ Avoid any skin exfoliation for 72 hours following treatment.
- ☐ Avoid any products that contain alpha hydroxy acids, retinol, and glycolic acid for at least 7 days after treatment.
- ☐ Avoid swimming for 72 hours after treatment.
- ☐ Wear SPF 30 or greater sunscreen for at least 2 weeks following treatment as your skin will be more sensitive to sunlight afterwards.
- ☐ Avoid any hair removal treatments such as waxing for 2 weeks after treatment or until the initial redness and swelling has resolved.
- ☐ You must seek emergency medical attention if you experience any severe allergy symptoms or features of anaphylaxis. These may include rash, breathing difficulties and facial swelling.
- ☐ Your practitioner will advise when further treatment appointments are required. If you are advised to attend a follow up appointment, please do make every effort to attend them. You should do this even if you believe that the recovery process is going well and you cannot see that there are any visible complications.
- ☐ Avoid any perfumes, fake tan or other harsh chemicals for 72 hours after treatment.
- ☐ Avoid rubbing or picking the treated area.
- ☐ It is important to use a regular moisturising cream around two to three times a day on the treated area. Use more regularly if you feel the skin dry or peeling.
- ☐ Avoid strenuous exercise, saunas, sunbeds and exposure to heat for 72 hours after treatment. These can cause sweating which can irritate the delicate skin and slow down your ability to heal quickly.
- ☐ Avoid any excess alcohol or caffeine for 48 hours after treatment.
- ☐ Avoid any further cosmetic treatments e.g. Botox or dermal filler for 2 weeks following treatment, or ask your practitioner for advice.
- ☐ You must seek medical attention and contact your practitioner if you experience any signs or symptoms of infection after treatment. Infection can present as hot, red shiny skin, there may be pus formation and you may have a fever or feel generally unwell.
- ☐ You must contact your practitioner as soon as possible if you notice any other unwanted side effects.

It is essential that you have read all of the information available. Once you have read and understood all of the below, please sign the declaration at the bottom of this form. Please do let your practitioner know if you have any questions or if you do not understand any of the aftercare instructions provided below.

- ☐ I confirm that I have read and understood all the information on this Form and that I have been given the opportunity to ask any questions that have come to mind throughout.
