

Venus Freeze

Venus Freeze

Status: activeForm type: defaultCompany: Acme Inc

DisclaimerProcedure Information: Venus Freeze is a non-invasive skin-tightening and wrinkle-reduction treatment that uses a combination of multipolar radiofrequency (RF) and pulsed electromagnetic fields (PEMF). The treatment heats the deeper layers of the skin, stimulating collagen and elastin production, improving skin firmness, reducing the appearance of wrinkles, and promoting a more youthful contour. It can be used on the face, neck, and body to address laxity and early signs of aging. Risks and Side Effects: Common side effects include temporary redness, mild swelling, and warmth in the treated area. Rare risks may include burns, skin sensitivity, blistering, or uneven skin texture. In some cases, results may be minimal, and additional sessions may be required for optimal results. Contraindications: Venus Freeze is not suitable for individuals who are pregnant, breastfeeding, have pacemakers, defibrillators, implanted metal devices in the treatment area, active skin infections, cancer, uncontrolled thyroid disorders, or certain autoimmune diseases. Aftercare: Patients can usually resume normal activities immediately after the procedure. It is important to maintain hydration, follow a healthy skincare routine, and protect the treated area from excessive sun exposure. A series of treatments is typically recommended for best results, with maintenance sessions as advised by the practitioner.

Informed Consent and PhotographyI have been advised of the relevant information associated with this treatment and I confirm that I fully understand this advice. This includes advice about: the aims/motivations for having the procedure and the desired outcome the risks inherent in the procedure the risks inherent in refusing the procedure the risks specific to me the expected benefits of the treatment the potential disadvantages of the treatment alternative procedures and their pros and cons – including the option of no treatment at all any uncertainties about and the likelihood of success of the procedure any follow-up treatment that may be required Clinical Photographs and Videos: I agree to and authorise the taking of clinical photographs and videos.
